

Summary

Frontend Engineer with **3+** years of experience building interactive web applications using React and TypeScript. Strong UX sense, hands-on BFF development with Node.js/Express, and experience delivering secure, scalable frontend systems in collaboration with product and design teams.

Skills Summary

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SASS/SCSS
- **Frameworks/Libraries:** React.js, Angular, Redux, Next.js, React Router, Context API, Material UI, Tailwind CSS
- **Testing:** Jest, React Testing Library
- **Build Tools:** Webpack, Babel, Vite, NPM, PNPM
- **Version Control:** Git, GitHub, BitBucket
- **APIs:** RESTful APIs, Axios, Fetch API
- **Others:** GitHub Actions, Jenkins, Agile Methodology, Jira, Figma (for UI), Storybook, ESLint, Prettier, Postman

Work Experience

Prospecta Software

Bengaluru, India

Development Engineer

February 2023 – Present

- Built and shipped **15+ production-grade frontend features** using React and TypeScript, supporting hundreds of daily enterprise users with zero production rollbacks.
- Designed and maintained Express backend-for-frontend (BFF) services, reducing frontend API calls by **40%** and improving data-fetch latency by **300ms per page**.
- Refactored critical React modules using memoization, code-splitting, and state normalization, cutting initial **page load time by 25%** and improving Lighthouse performance scores.
- Redesigned authentication and login flows, increasing successful login **completion rates by 30%** and reducing user drop-offs.
- Implemented secure frontend practices (**XSS prevention, CSRF-safe auth flows**) aligned with OWASP Top 10, contributing to zero security incidents in owned modules.
- Built and delivered **AI-assisted features (Kai)** that automated manual data entry, reducing user effort by **70%** and improving processing efficiency by **80%**.
- Led frontend development for **MDO OneView** (Angular 16) after requirement analysis, enabling unified record visibility and reducing **decision-making time by 75%** for business users.
- Collaborated closely with UX and product teams using Figma wireframes, translating designs into responsive, accessible UI components and reducing UX-related support tickets by **40%**.

Projects

- **Pro Manage:** Engineered Pro Manage, a performance evaluation tool, which enhanced assessment efficiency by **30%** through adaptive feedback, positively impacting employee satisfaction scores by **15 points**.↗
- **Quizze:** Developed Quizze, an interactive quiz system featuring real-time score tracking, boosting user engagement by **25%** through an intuitive interface and gamified learning experience.↗
- **SAIT Faculty Insights:** Designed a review portal that increased faculty feedback analysis efficiency by **20%**, enabling data-driven academic planning.↗

Education

Visvesvaraya Technological University

Bachelor of Technology in Computer Science and Engineering

GPA: **8.7** CGPA

Belagavi, India

July 2019 - May 2023

- Ranked in the **top 3** of the college.

Achievements

MDO Hackathon

Gurgaon, India

- Secured 2nd place out of 20+ competing teams by developing a scalable ‘Request Type’ field feature, integrating feature flags for controlled rollout. Contributed over **80%** to the front-end implementation, leading to a 30% performance improvement.
