Gurugram, Haryana

Summary

SDET with 2+ years of experience in automation testing, API testing, and CI/CD integration. Proficient in Java, Selenium, TestNG, JUnit, and REST Assured. Experienced in building automation frameworks, executing performance testing, and ensuring high quality software delivery in agile environments.

Technical Skills

Languages: Java

Automation: Selenium WebDriver

API Testing: Postman, REST Assured

Frameworks: JUnit, TestNG

CI/CD: Jenkins, GitHub Actions,

Database: MySQL

Performance: JMeter, k6

Work Experience

QA Analyst | Prospecta Software Pvt. Ltd.

April 2024– Present

- Identified and resolved 180+ defects in the DIW module using Selenium and TestNG.
- Achieved 85%+ automation test coverage in every sprint and integrated test execution with Jenkins CI/CD pipelines.
- Improved application performance by reducing system response time by 50% through JMeter performance testing.
- Executed end-to-end and regression testing, preventing 2 critical production issues.
- Supported major technology upgrades while ensuring zero downtime during deployment activities.
- Monitored system performance metrics such as CPU, memory, and load utilization after deployment.
- Increased overall test coverage by 30%+ through collaboration with DevOps teams.
- Reduced test case creation effort by 25% using AI-powered automation tools.

Project

ShopEase E-Commerce Web Automation Framework

Technologies Used: Java, Selenium WebDriver, TestNG, Maven, Jenkins

- Developed a Selenium-based automation framework using Java and TestNG for an e-commerce web application.
- Automated end-to-end user workflows including login, product search, add-to-cart, checkout, and order placement.
- Implemented Page Object Model (POM) design pattern to improve code reusability and framework maintainability.
- Integrated TestNG listeners and Extent Reports for detailed test execution reporting.
- Performed cross-browser testing on Chrome and Edge browsers using Selenium WebDriver.
- Integrated automation suite with Jenkins CI/CD pipeline for scheduled and continuous execution.

KEY ACHIEVEMENTS

- Contributed to platform upgrade from Spring Boot 2.4.7 to 3.4.2 and Angular 14 to 19.
- Identified critical defects and prevented 2 production deployment issues.
- Improved regression and migration testing processes, enhancing overall release stability.

EDUCATION

Bachelor of Technology (BTech)

Gandhi Institute for Technological Advancement

2019 – 2023
